# Style Master

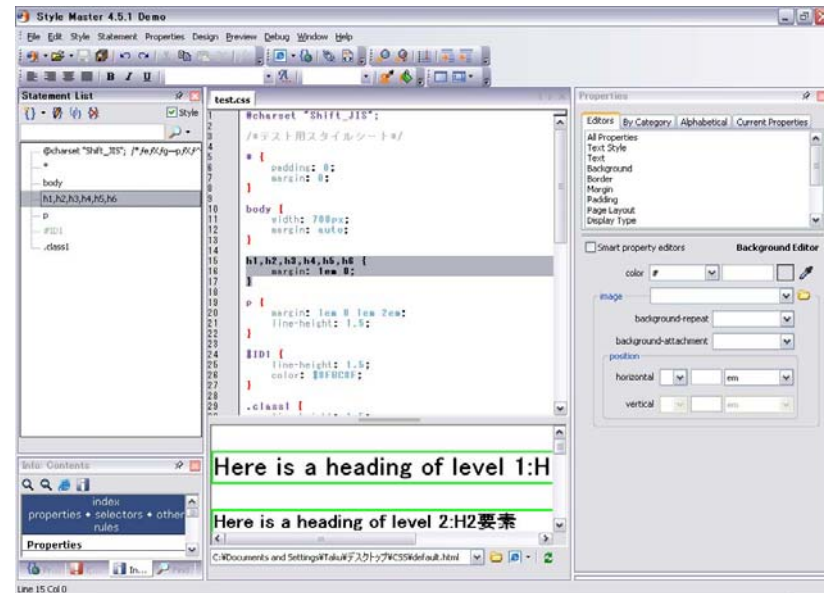

[http://www.westciv.com/style\\_master/](http://www.westciv.com/style_master/)

- Win・Mac両対応
- \$59.95

The screenshot shows the homepage for Style Master, a web standards software and learning tool. The page features a navigation bar with links for HOME, STYLE MASTER, LEARNING, SUPPORT, DOWNLOADS, and STORE. The main content area is titled "style master" and includes a "CSS EDITION" badge. Key information includes the new version (4.5.1 released June 2006), supported platforms (Windows 2000/NT/XP and MacOS X 10.3 or higher), a cost of \$459.99, and a 30-day demo limit. A list of features is provided, categorized into "New to CSS?", "Know your stuff?", and "CSS Pro?". Two prominent buttons, "download" and "buy now", are visible. A testimonial from David Perkins is included, along with a section titled "WHAT CAN STYLE MASTER DO?". A quote from Macworld magazine is also present, praising the tool's capabilities. The footer contains copyright information for WestCiv Software, Inc. and mentions the version (1.0.1) and year (2004).

# Style Masterの特徴

- 要素間の親子関係を視覚的に表現(X-ray)。
- 何がなんだかよくわかんない機能が満載。
- Win版はShift\_JIS、Mac版はUTF-8。
- 日本のユーザは少ないかも。

# CSSEdit

### CSSEdit. Style for the rest of us.

The CSSEdit Power Tools (roll over an icon to learn more)

Design great looking, innovative and fast loading sites...  
... with a great looking, innovative and fast application!

Quite simply put, CSSEdit will save your sanity when editing style sheets. Its intuitive approach to style sheets and powerful editing features will make you deliver beautiful standards-based sites in no time!

#### Source editing. Smarter. (Updated!)

CSSEdit features full-blown source editing for the advanced user. With one click you transform the easy to use visual editors into a mighty source code environment.

Besides standard coding features such as syntax coloring, find and replace, go to line and auto-indentation, CSSEdit offers intelligent auto-complete. It will never suggest double properties, is fully context sensitive, and remembers the items you use most. What does this mean in practice? That the time you spend typing properties and their values will be drastically reduced!

And with CSSEdit 1.7, the source editor is even faster than before. We optimized the editor significantly, with very noticeable speed boosts all over the place!

#### Point and Click, too (Updated!)

Our familiar visual editors are still around, better than ever. It's full of little features that will make your life easier.

Just to name a few: a customizable panes bar, offering the easiest way to switch between the editors. There is the cool border editor, giving you true WYSIWYG editing. Arrow up/down in text fields increases/decreases the values (just like in Photoshop). And you will certainly enjoy little touches like being able to drop an image and have the relative path inserted in the text field.

#### Preview to the extreme! (Updated!)

CSSEdit lets you see your styles in three different ways: quickly in the outline view, instantly in the preview drawer and in the context of your web pages in the extended preview.

Quick preview: immediately recognize your styles by their look in the list. Instant preview: see a basic preview of the styles in a handy drawer.

Mac Universal

#### Info and Requirements

Requires Mac OS X 10.3.9 or better.

Demo is fully functional, but saving is limited to style sheets with less than 2499 characters.

#### What Others Say

MacUpdate Rating:  
★★★★★

VersionTracker Rating:  
★★★★★

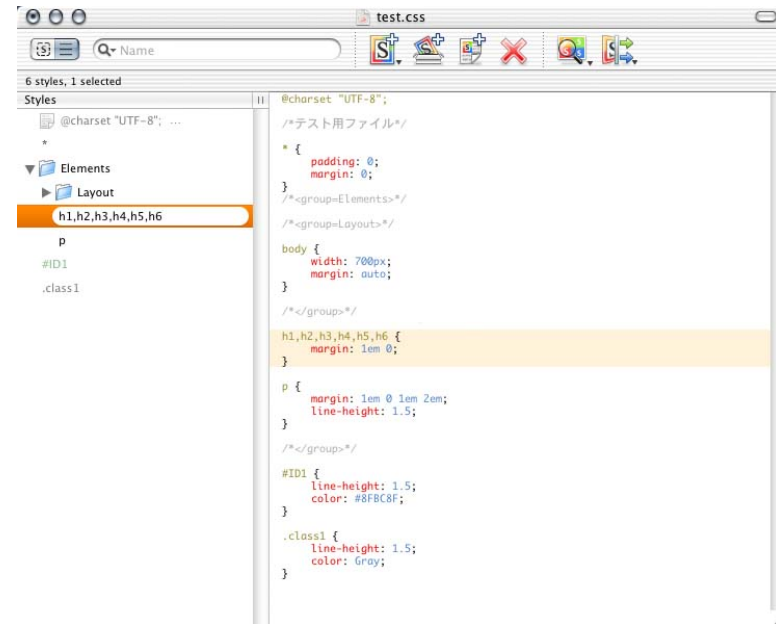

*"I heart CSSEdit. Makes my life so much easier!"*

*"Works well and makes the tedious process of coding CSS much simpler. Nothing else quite like it for OS X."*

*"A great tool to have in your developer toolbox."*

# CSSEditの特徴

- コメントでセレクタを階層管理できるのが便利。
- 値段の割りに高性能。
- 日本語はUTF-8。
- 置換がないのが惜しい。
- Macユーザはコレで。

# TopStyle Pro

### TopStyle for Windows

Looking for a powerful tool for creating standards-compliant sites? Consider TopStyle, written by the creator of HomeSite, the world famous HTML editor. You can edit your HTML, XHTML, and CSS in a single program. The program offers many unique features, including the option to upgrade your HTML documents by replacing outdated markup with equivalent styling. You can also convert HTML to XHTML and check your CSS syntax against multiple browsers, using a side-by-side preview. A harmonious colors feature allows you to easily create pleasant color schemes for your site and more. TopStyle Pro offers complete site management with the built-in File Explorer, clip libraries and resource manager and integrates with existing web authoring tools.

- Single editor for HTML, XHTML, and CSS
- Style Checker to validate style sheets against multiple browsers
- Style Upgrade tool to quickly and reliably replace all outdated HTML code
- Site Reports to see at-a-glance where styles are used in your site
- [Download 30-Day Free Trial](#)
- [Buy Now \\$79.95](#)
- For more information contact us at [tp@newsgator.com](mailto:tp@newsgator.com)

# TopStyle Proの特徴

- 入力補完が超強力。さすがHomeSiteの開発者。
- 日本語はShift\_JIS。が、かなり怪しい。
- そんなものに\$79.95払ってもいいのか？という方は...

# TopStyle Liteの特徴

- 強力な入力補完機能はほぼそのまま。
- なんと無料。
- しかし、検索なし、置換なし。プレビューは自力で。
- タダだからガマンしよう。

## まとめ

---

- Style Masterを使いこなして解説サイトを作ったら人気者になれるかも。
  - Mac OS Xの人はCSSEditでOK。安いし。
  - Winの人は、とりあえずTopStyle Lite。  
物足りなくなったら、Pro版でもいいのかな？
  - テキストエディタ+マクロとかで  
がしがしCSSかける人がうらやましいです。
-

終わりです。
